5. Muscle tonification  
(Stomach, Leg, Arm, Bottom, Back, Face, Breast Tightening)
6. Lifting "Treatments depending on sagging"
7. Increasing skin elasticity on the face
8. Pain, edema, fatigue syndrome on legs
9. Premenstrual edema

## After Therapy

During and after the therapy, the patients demonstrated an excellent compatibility with the device, no problems have occurred and no complaints have been raised by the patients. Immediately after the application, all of the patients have emphasized the happiness they had, the light feeling on their legs and the power in their muscles.

After the third-fourth patient, the maintenance began to give result. Beginning from these weeks, an excellent increase in the tissue elasticity, smoothening in lines of the body, a better blood circulation and a visible decrease in the fat tissues have been observed.

On the subjects, who had a previous liposuction operation, besides the other positive effects, a serious decrease has been determined in accordance with the standards in the recovery period and this development has been recorded.

Aristo Micro Plus has been applied on all the subjects without any side effects and causing any risk and significant results have been obtained both in view of functionality and aesthetics at the end of the processes.
